students  
the lectur  
exam is p  
assignment.

for the teacher to improve the lectures: talk harder, tell more questions.  
rehand. The specific purpose of the project was very vague at e.

it is understandable that before doing the case study, we  
, but doing the project felt hastily. A suggestion would be that  
t the students can begin with the case study. And if a mid term  
during the first 4 weeks, while actually also preparing to do the

- I personally believe mr Oliveira should not be a lecturer, he has proven to have knowledge on the subject no doubt, however, his communication and presentation skills are way below the minimum (speaking too quietly, no enthusiasm shown whatsoever, and, in general, very dull lectures)

- In the amount of work for this course really exceed 5 credits. I think in average I have spent about 20-30h weekly (self materials included)
- too many hours for the group project so until next year try to be really clear what is expected to be in the report so much time that assignment.
- is necessary too do the scientific articles presentations, it is enough with the presentation of the group project.

evaluate the most important things that you want to address

visible that they really cared and wanted to make it as

- The content is interesting and well linked to civil engineering. MCDA is too complex to discuss in two lectures. Mr Oliveira has done a good job planning the course content but I would strongly recommend him not to be a lecturer (or take a course on how to give proper lectures)

- me do the presentation of the paper so more time could be spend in an early state to the project

# 2019 - 2020

## 17. Open questions

- I can't believe I'm paying 15000 euros a year to attend classes like this. Absolutely disappointing.
- Joao could use some more excitement in his teaching.
- Joao has to learn how to deal with intonation and how to present himself (he is always teaching with his jacket on).

The exam was really bad. 30 multiple choice question. All the questions were literally taken from books, slides, literature. You just have to reproduce everything. you just miss the point and

- The module is not want
- The project should be b scope but with more foc
- The gives a bad

worse c

# DIRECTOR OF PHOTOGRAPHY

**Mohsen Bastani**

A warm, atmospheric scene featuring an open book as the central focus. The book's pages are illuminated from within, creating a bright, golden glow that radiates upwards. To the left, a lit candle in a brass holder casts a soft, warm light. The background is dark, with numerous small, out-of-focus lights hanging from above, resembling a string of fairy lights. The overall mood is cozy and intellectual.

*Professors in a student's life are a series of hellos and goodbays. Most you forget, but a few define you!*
